bijay3030.github.io

SUMMARY

Senior software engineer with 5+ years building Ruby on Rails, React, and AWS systems for US clients. Leads client applications end to end: PostgreSQL data modeling, REST APIs, Sidekiq background jobs, real-time features with ActionCable and Hotwire, microservices on AWS, CI/CD, and mentoring.

Open to senior full-time remote roles · 4+ hours overlap with US Eastern · full EU workday overlap.

EXPERIENCE

Senior Software Engineer | Truemark Private Limited

Aug 2022 - Present · Kathmandu, Nepal

- Led development and maintenance of 6+ Ruby on Rails client applications, delivering scalable architecture and complex business logic across projects.
- Optimized React.js interfaces and implemented Hotwire (Turbo + Stimulus.js), reducing initial page load time by ~35% and removing full-page reloads in key flows.
- Migrated monolithic systems to microservices on AWS (EC2, S3, Lambda), reducing inter-service latency by 40%.
- Built and maintained RESTful APIs supporting 500K+ monthly requests while sustaining 99.9% uptime.
- Implemented comprehensive test suites with RSpec and Jest, achieving 87% code coverage and reducing production bug reports by 35%.
- Designed and optimized PostgreSQL schemas and indexing strategies, cutting critical query execution time by up to 60%.
- Established CI/CD pipelines with GitLab CI and AWS CodePipeline, reducing deployment cycle time from ~45 minutes to under 8 minutes.
- Mentored 3 junior engineers through weekly code reviews and practical coaching in Rails and React.js best practices.
- Collaborated with product managers and designers to translate business requirements into technical specifications and sprint-ready deliverables.

Stack: Ruby on Rails, React.js, Hotwire, PostgreSQL, AWS (EC2, S3, Lambda), Microservices, RSpec, Jest, GitLab CI, AWS CodePipeline

Associate Software Engineer | Truemark Private Limited

Apr 2021 - Aug 2022 · Kathmandu, Nepal

- Developed scalable RESTful APIs and backend services with Ruby on Rails for high-traffic applications with consistent sub-200ms response times.
- Contributed to React.js frontend development, improving UX responsiveness and reducing client-reported UI issues by 25%.
- Integrated 10+ third-party APIs including payment, analytics, and communication services for reliable cross-system data exchange.
- Created and maintained unit and integration test coverage with RSpec, improving reliability and reducing regression debugging time.
- Helped the team adopt Agile/Scrum, contributed to sprint planning, and kept technical documentation current for cross-functional partners.
- Participated actively in code reviews to enforce best practices and raise overall code quality.

Stack: Ruby on Rails, React.js, REST APIs, Third-party API integrations, RSpec, Agile/Scrum

SELECTED PROJECTS

- **Helios:** Helios is a workflow platform that runs medical translation projects end to end — from file intake to vendor coordination, delivery, and invoicing. It replaced a process run on email and spreadsheets with one auditable system. (bijay3030.github.io/projects/helios)
- **Quoting:** Quoting is a quote-management platform that turns a healthcare translation request into an accurate, versioned price quote. It centralizes pricing rules, tracks every revision, and hands approved quotes straight to delivery. (bijay3030.github.io/projects/quoting)

- **AListEngine:** AListEngine is an AI tool that turns product photos into ready-to-publish listings for e-commerce stores and auction houses. It drafts the title, description, and price, then exports to Shopify, AuctionFlex, and LiveAuctioneers. (bijay3030.github.io/projects/alistengine)

OPEN SOURCE

- **NEPSE Trade Journal:** A full-stack trading journal for Nepal Stock Exchange (NEPSE) traders: plan, execute, and review trades, keep a daily journal, track a portfolio, and see analytics like win rate, P&L, and expectancy. (github.com/bijay3030/nepse-trade-journal)

TECHNICAL SKILLS

Languages: Ruby, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frameworks & libraries: Ruby on Rails, React.js, Redux, Hotwire (Turbo & Stimulus), Sidekiq

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & infrastructure: AWS (EC2, S3, Lambda, RDS, CodePipeline), Docker, Kubernetes, Nginx

APIs: RESTful API design, GraphQL, Third-party API integration

Testing: RSpec, Jest, TDD, BDD, Integration testing

CI/CD & tools: GitLab CI, GitHub Actions, CircleCI, Git, GitHub, GitLab

Practices: Agile/Scrum, Microservices architecture, System design, Code review

EDUCATION

B.Tech, Computer Science | Maharshi Dayanand University · 2016 – 2020
