SKILLS

Languages: Ruby, JavaScript (ES6+), HTML5, CSS3

Frameworks: Ruby on Rails, React.js

Databases: PostgreSQL, MySQL, MongoDB

Tools & Technologies: Git, Docker, Kubernetes, Nginx, RSpec, Jest

CI/CD: GitLab CI, CircleCI

Version Control: Git, GitHub, GitLab

Development Practices: Agile/Scrum, TDD, BDD

EDUCATION

Maharshi Dayanand University

2016-2020

B.Tech Computer Science

PROFILE

Software Engineer with more than 3.5 years of hands-on experience in Ruby on Rails and React.js, adept at building robust, scalable systems and delivering user-centric solutions. Skilled in designing high-performance APIs, transitioning monolithic architectures to microservices, and optimizing data models for large-scale applications. Recognized for strong problem-solving abilities, improving system performance, and fostering cross-functional collaboration to deliver impactful results. Passionate about translating complex business requirements into innovative technical solutions, aligning with Square's mission to empower businesses to grow and thrive.

WORK EXPERIENCE

Software Engineer

Truemark Private Limited

2022 Aug - Present

- Led the development and maintenance of multiple Ruby on Rails applications, designing scalable solutions and implementing complex business logic for various client projects.
- Optimized React.js interfaces, boosting performance through efficient state management and component architecture.
- Migrated monolithic systems to microservices architecture on AWS, enhancing scalability and reducing latency.
- Implemented comprehensive test coverage with RSpec and Jest, achieving code coverage and reducing production bugs.
- Collaborated closely with product managers and designers to translate business requirements into technical specifications and ensure the timely delivery of features.
- Designed and optimized database schemas in PostgreSQL, improving query performance through effective indexing strategies and query optimization.
- Established CI/CD pipelines using Git and AWS, automating testing and deployment processes to reduce deployment time.
- Mentored junior engineers in Ruby on Rails and React.js best practices, fostering skill development and enhancing team productivity.

Associate Software Engineer

Truemark Private Limited

2021 Apr - 2022 Aug

- Assisted in the development of scalable APIs and backend services using Ruby on Rails to support high-traffic applications.
- Contributed to frontend development with React.js, improving user experience and application responsiveness.
- Assisted in the adoption of agile methodologies, including leading sprint planning sessions and maintaining technical documentation for cross-functional teams.
- Participated in code reviews, ensuring adherence to best practices and contributing to the continuous improvement of team standards.
- Created and maintained unit and integration tests to improve the reliability of new features and reduce time spent on debugging.
- Integrated third-party APIs, enabling seamless data exchange and improving application functionality for clients.
