

BIJAY SUBEDI

Senior Software Engineer | Ruby on Rails | React.js | AWS

+977-9847330753 • sharma.bj11@gmail.com • Kathmandu, Nepal • linkedin.com/in/bijay-psubedi • github.com/bijay3030

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 5+ years of hands-on experience building scalable, high-performance systems in Ruby on Rails and React.js. Proven track record of migrating monolithic architectures to microservices on AWS, designing RESTful APIs supporting high-traffic applications, and optimizing PostgreSQL data models for performance at scale. Recognized for mentoring junior engineers, leading CI/CD automation initiatives, and translating complex business requirements into robust technical solutions. Experienced with Agile/Scrum, TDD/BDD, and cross-functional collaboration.

WORK EXPERIENCE

Software Engineer | **Truemark Private Limited**

Aug 2022 – Present

- Led development and maintenance of 6+ Ruby on Rails client applications, designing scalable architectures and implementing complex business logic, contributing to on-time delivery across all projects.
- Optimized React.js interfaces and implemented Hotwire (Turbo + Stimulus.js) for real-time UI updates, reducing initial page load time by ~35% and eliminating full-page reloads across key user flows.
- Migrated monolithic systems to microservices architecture on AWS (EC2, S3, Lambda), reducing inter-service latency by 40% and improving horizontal scalability for high-traffic workloads.
- Built and maintained RESTful APIs supporting 500K+ monthly requests, ensuring 99.9% uptime through robust error handling and performance optimization strategies.
- Implemented comprehensive test suites using RSpec and Jest, achieving 87% code coverage and reducing production bug reports by 35%.
- Designed and optimized PostgreSQL database schemas with advanced indexing strategies, cutting critical query execution times by up to 60%.
- Established CI/CD pipelines using GitLab CI and AWS CodePipeline, reducing deployment cycle time from ~45 minutes to under 8 minutes.
- Mentored 3 junior engineers in Ruby on Rails and React.js best practices, conducting weekly code reviews and fostering a culture of continuous improvement.
- Collaborated with product managers and designers to convert business requirements into detailed technical specifications, ensuring consistent feature delivery within sprint timelines.

Associate Software Engineer | **Truemark Private Limited**

Apr 2021 – Aug 2022

- Developed scalable RESTful APIs and backend services using Ruby on Rails, supporting high-traffic applications with consistent sub-200ms response times.
- Contributed to React.js frontend development, improving UX responsiveness and reducing client-reported UI issues by 25%.
- Integrated 10+ third-party APIs (payment gateways, analytics, communication services), enabling seamless data exchange and expanding application functionality.
- Created and maintained unit and integration tests with RSpec, improving feature reliability and reducing regression debugging time.
- Assisted in adopting Agile/Scrum methodologies, led sprint planning sessions, and maintained technical documentation for cross-functional teams.

- Participated actively in code reviews, enforcing best practices and contributing to measurable improvements in code quality standards.

TECHNICAL SKILLS

Languages: Ruby, JavaScript (ES6+), HTML5, CSS3, SQL

Frameworks & Libraries: Ruby on Rails, React.js, Redux, Hotwire (Turbo & Stimulus.js), Sidekiq

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & Infrastructure: AWS (EC2, S3, Lambda, RDS, CodePipeline), Docker, Kubernetes, Nginx

APIs: RESTful API Design, GraphQL, Third-Party API Integration

Testing: RSpec, Jest, TDD, BDD, Integration Testing

CI/CD & Version Control: GitLab CI, CircleCI, GitHub Actions, Git, GitHub, GitLab

Development Practices: Agile/Scrum, Microservices Architecture, System Design, Code Review, Technical Documentation

EDUCATION

B.Tech, Computer Science | [Maharshi Dayanand University](#)

2016 – 2020
